

Martina Belanová

Self-thought Full Stack Web Developer former Network Engineer

WORK EXPERIENCE:

VNET a.s.

Network Engineer

2021 – 2023

Responsibilities:

- I was a part of multiple network improvements leading to customer satisfaction
- Every customer ticket was a priority so I've always met the SLA with a great time to spare
- I was setting up an infrastructure for mass events where the availability and reliability was crucial
- Set up network and supported live events with thousands of visitors
- I created a workflow with the help of Python scripts to release unused public IPv4 addresses as my personal side project

AT&T Global Network Services Slovakia, s.r.o.

LAN/WAN Service Manager

2018 – 2021

Responsibilities:

- I proactively reviewed even closed incident tickets to seek problem mitigation
- I helped to avoid incidents by seeking out recurring problems and suggesting solutions
- I created a documentation system to keep a better overview during Aruba transformation and proactively followed up on found issues

X-NET spol. s r. o.

Technical Specialist

2017 – 2018

Responsibilities:

- I personally organised and overviewed a transformation at Billa sites
- I implemented and documented IEEE 802.1X at our company to pass a security audit
- I was flexible to support a wide variety of different devices and services (Huawei, Digi, Sophos, Pulse secure, LAN, WAN, Wifi solutions, VPN solutions)

AT&T Global Network Services Slovakia

Dedicated Client MACD Engineer

2012 – 2017

Responsibilities:

- The biggest project was migration of Sears stores under AT&T where me and my small team came up with a workflow to migrate 3000 stores in a few months
- I worked through a huge amount of language barrier working at the sites with no english speakers with the use of a non-technical translator with successful results
- I've met with a variety of devices like Juniper, F5, Arubas, Netgates and more
- I lead the calls during the installations with team members from multiple companies and multiple countries
- We supported the AT&Ts infrastructure for dedicated customers around the world 24/7.
